OUTREACH ZIMBABWE

reaching out & give a hand to community....

From People to Pupil Network

Outreach Zimbabwe is an organization that seeks to promote on the welfare and networking of schools through Information Communication Technology (I.C.T). In essence we are a grouping of professionals from various I.C.T fields coming together to offer aid to schools and community in form of information technology services and material support for their development. Our main thrust is on creating a consolidated networking of all stakeholders that prompts a crucial participatory response in devising and sharing developmental strategies, thus charging schools and their community to their own development.

This integrated network would then translate into all-schools-online website that would bring information technology to schools and also present a networking platform for development.

KEY PROGRAM AREAS(K.P.A's)

Infrastructure development and Material Support Programs (IMSP's)
Outreach supports schools with strategies, material and funding for their infrastructure
